Subject Index of Volume 210/211

Absorbing LB films
  critical edge studies of highly absorbing Langmuir–Blodgett films 693
Absorption spectroscopy
  symmetry and orientational structure in hemicyanine monolayer by surface second harmonic generation and absorption spectroscopy 699
Acoustic wave device
  gas detection in the ppb-range with a high frequency, high sensitivity surface acoustic wave device 474
Adsorption LB films
  infrared and inelastic electron tunneling spectroscopy of adsorption Langmuir–Blodgett films containing crystal violet and merocyanine dye 531
Aggregated chromophore systems
  electro-optical spectroscopy on aggregated chromophore systems in Langmuir–Blodgett films 670
Aggregation control
  aggregation control of photochromic spiropyrans in Langmuir–Blodgett films 560
Alkanethiols
  self-assembled monolayers of alkanethiols on gold: sulfone groups enhancing two-dimensional organization 806
Alternating layer structures
  surface potentials of Langmuir–Blodgett alternating layer structures 4
Alternating-layer trough
  a novel alternating-layer trough 19
Amphipathic porphyrin
  photoelectric properties of Langmuir–Blodgett films containing amphipathic porphyrin and carbazole 332
Amphiphiles
  UV study on the interaction of amphiphiles with heterocyclic chromophores 124
Amphiphilic amino acid esters
  oriented polypeptide monolayers by rapid spontaneous condensation of amphiphilic amino acid esters 393
Amphiphilic cyclodextrins
  molecular recognition by amphiphilic cyclodextrins in Langmuir–Blodgett films 803
Amphiphilic molecules
  two-dimensional molecular engineering of amphiphilic dithio tetrathiafulvalene derivatives 131
Amphiphilic Ni-phthalocyanine
  relationship between structure and function of a Langmuir–Blodgett film of an amphiphilic Ni-phthalocyanine responsive to NO_2 446
Amphiphilic phthalocyanines
  structural evaluation of Langmuir–Blodgett films of amphiphilic phthalocyanines using infrared spectroscopy 538
Amphiphilic polyamic acid systems
  molecular packing of amphiphilic polyamic acid systems in Langmuir–Blodgett films 620
Amphiphilic polymer
  a new kind of amphiphilic polymer—reversed duckweed type Langmuir–Blodgett film 625
Amphiphilic polymer $PAMC_{16}S$
  monolayer formation of a novel amphiphilic polymer $PAMC_{16}S$ 839
Amphiphilic supramolecular structures
  polymeric gegenions induced variability and mobility of amphiphilic supramolecular structures on solid substrates 111
Amylose esters
  Langmuir–Blodgett films of non-linear optical dyes with chiral centers in matrices of amylose esters 166
Analytic surface spectroscopy
  analytical surface spectroscopy of phospholipid Langmuir–Blodgett films 565
Angle-resolved photoemission
  angle-resolved photoemission from Langmuir–Blodgett films of copper tetrakis(n-butoxycarbonyl)phthalocyanine with synchrotron radiation 678
Antibiotics
  drugs in biomimetic models: a monolayer study of two antibodies 747
Antibody binding
  steric and electrostatic aspects of antibody binding to hapten functionalized lipid monolayers 793
Antibody monolayers
  antigen recognition properties of antibody monolayers 726
Antigen recognition
  antigen recognition properties of antibody monolayers 726
Applications
  possible applications for Langmuir–Blodgett films 417
Arachidic acid
  secondary ion mass spectrometry studies of mixed arachidic acid and barium arachidate Langmuir–Blodgett films 524
Archaebacterial lipid models
  Langmuir–Blodgett films of archaebacterial lipid models: 1,1′-polymethylenebis(2-alkyl-*sn*-glycero-3-phosphocholine) 108
Atomic force microscopy
  scanning tunneling microscopy and atomic force microscopy on organic and biomolecules 640
Attenuated total reflection spectra
  Fourier transform infrared metal overlayer attenuated total reflection spectra of Langmuir–Blodgett films of 12-hydroxystearic acid and its cadmium salt 583
Azobenzene
  modulated photoregulation of liquid crystal alignment by azobenzene Langmuir–Blodgett layers 836
  photoelectric response of black lipid membranes incorporating an amphiphilic azobenzene derivative 736
Azobenzocrown ether derivatives
  studies on non-linear optical properties of Langmuir–Blodgett films formed from azobenzocrown ether derivatives 208
Azocompounds
  the effect of the external DC electric field on pyroelectric response of azocompound-based Langmuir–Blodgett films 437

Bacteriochlorophyll
  factors determining stability of bacteriochlorophyll monolayers 753
Bacteriorhodopsin
  photoresponse of Langmuir–Blodgett film containing bacteriorhodopsin 760
Bending elastic modulus
  bending elastic modulus of monolayers at oil-water interfaces 118

Bidimensional mixtures
bidimensional mixtures of biological fluids at the air-water interface 105
Bilayer membranes
synthesis of polysiloxane films with varied microstructures in matrices of carbazole-containing bilayer membranes 26
Binary mixtures
conducting Langmuir–Blodgett films of binary mixtures of donor and acceptor molecules 261
Biological lipids
bidimensional mixtures of biological fluids at the air-water interface 105
Biological membranes
Fourier transform infrared spectroscopic studies on model biological membranes deposited by the Langmuir–Blodgett technique 574
Biomimetic models
drugs in biomimetic models: a monolayer study of two antibodies 747
Biomimetic property
the biomimetic property of gas-sensitive films for odorants constructed by the Langmuir–Blodgett technique 455
Biotinylated monolayers
Langmuir–Blodgett films of streptavidin-conjugated phycoerythrin bound to biotinylated monolayers 796
Biotin-streptavidin
molecular recognition in biotin-streptavidin systems and analogues at the air-water interface 780
Biphenyl mesogenic groups
Langmuir–Blodgett films of crown ether containing biphenyl mesogenic groups 628
Brewster angle
reflectometry at the Brewster angle and Brewster angle microscopy at the air-water interface 64

Cadmium arachidate
thickness and temperature dependent structure of Cd arachidate Langmuir–Blodgett films 577
Capillary waves
capillary waves: a new monolayer characterization technique using an old method 96
Carbazole
photoelectric properties of Langmuir–Blodgett films containing amphipathic porphyrin and carbazole 332
Carotenoids
second harmonic generation in mixed carotenoid-fatty acid and carotinoid-cyclodextrin Langmuir–Blodgett films 221
CdS colloid
the preparation and properties of CdS colloid Langmuir–Blodgett film 404
Chain orientation
on the origin of main chain orientation of rigid-rod macromolecules during the Langmuir–Blodgett process 6
Charge transient spectroscopy
charge transient spectroscopy studies on metal/Langmuir–Blodgett/GaAs structures 324
Charge-transfer complex
molecular orientation in conductive Langmuir–Blodgett films of a charge-transfer complex 303
Charge-transfer interaction
charge-transfer complex formation in monolayers at the air-water interface 60
Chemical modification
control of photochemical switching phenomena by chemical modification 293
Chlorophyll *a*
characterization of monolayers and Langmuir–Blodgett films of dry and wet chlorophyll *a* 739
Chromophore orientation
investigation of chromophore orientation of 2-docosylamino-5-nitropyridine and derivatives by nonlinear optical techniques 198
Conducting LB films
conducting Langmuir–Blodgett films of binary mixtures of donor and acceptor molecules 261
conducting Langmuir–Blodgett films of new tetrathiafulvalene derivatives 317
conducting Langmuir–Blodgett films of tetracyanoquinodimethane and ethylenedithio-tetrathiafulvalene derivatives applied to gas sensing: gas diffusion and detection ranges 430
FTIR studies of conducting Langmuir–Blodgett films of *o*-hexadecylthiocarboxytetrathiafulvalene 589
molecular orientation in conductive Langmuir–Blodgett films of a charge-transfer complex 303
monolayer characterisation and multilayer deposition of conducting Langmuir–Blodgett films 287
new trends and prospects in conducting Langmuir–Blodgett films 240
the homodoping strategy towards Langmuir–Blodgett conducting films: mixture of amphiphilic octadecyl-tetracyanoquinodimethane with various semi-amphiphilic tetracyanoquinodimethane salts 250
Conducting LB layers
superlattices prepared from dielectric and two-component conducting Langmuir–Blodgett layers 309
Conductivity
conductivity in phthalocyanines and mixed phthalocyanine/lipid monolayers at the air-water interface 766
Coplanar patterns
coplanar patterns of self-assembled monolayers for selective cell adhesion and outgrowth 716
Copper phthalocyanine
Langmuir–Blodgett film assembly of Cu-phthalocyanine derivatives substituted by methacrylate oligomer chains 527
the characterization of two copper phthalocyanine Langmuir–Blodgett films and their gas-sensitive properties 606
Copper sulfide semiconductors
electrical properties of copper sulfide semiconductors inserted in Langmuir–Blodgett films 407
Critical edge studies
critical edge studies of highly absorbing Langmuir–Blodgett films 693
Crown ether
Langmuir–Blodgett films of crown ether containing biphenyl mesogenic groups 628
Crystal growth
effect of thermal treatment on crystal growth of the surface monolayer 98
Crystal violet
infrared and inelastic electron tunneling spectroscopy of adsorption Langmuir–Blodgett films containing crystal violet and merocyanine dye 531
Cyanine dye
excitation energy transfer between J-aggregates of cyanine dyes in Langmuir–Blodgett films and liposomes 172
organic electroluminescent device with cyanine dye Langmuir–Blodgett film as an emitter 468
resonance Raman and infrared studies of Langmuir–Blodgett films of 3,3-dimethyl-2-[3-(3,3-dimethyl-1-octadecyl-2-indolinylidene)- 1-propenyl]-1-octadecyl-3H-indolium iodide 597

Cyanoacrylate
preparation of cyanoacrylate Langmuir–Blodgett films and their ultraviolet and electron resist application 477
Cyclam
electrocatalytic reduction of CO_2 on a modified electrode with Langmuir–Blodgett films of nickel(II) complex with long alkyl substituted cyclam 381
Cyclodextrin
photopolymerization of a ω-tricosenoyl derivative of β-cyclodextrin in Langmuir–Blodgett films 387
Cytochrome b_5
incorporation of cytochrome b_5 into supported phospholipid bilayers by vesicle fusion to supported monolayers 763

DC electric field
the effect of the external DC electric field on pyroelectric response of azocompound-based Langmuir–Blodgett films 437
Defect annealing rate
defect annealing rate in monolayers displaying a smectic-L phase 515
Defect structures
defect structures of Langmuir–Blodgett films investigated by scanning force microscopy 655
Deposition
a novel range of potentially electroluminescent materials for Langmuir–Blodgett deposition 571
Deposition efficiency
dynamic contact angles and deposition efficiency for transfer of docosanoic acid on to mica from $CdCl_2$ subphases as a function of pH 36
Deposition processes
a novel alternating-layer trough 19
aspects of Langmuir–Blodgett trough design: computerization, surface pressure measurement, unevenness of motion, generated vibrations 13
Diacetylene monolayers
in situ X-ray diffraction of diacetylene monolayers 73
Diacetylene vapor deposition
homo-epitaxy of diacetylene vapor deposition film on an oriented Langmuir monolayer 353
Diazonaphthoquinone novolac resin
Langmuir–Blodgett resists of diazonaphthoquinone novolac resin produced by a new continuous horizontal deposition method 484
Discotic liquid crystals
mono- and multilayers made from discotic liquid crystals 39
Displacement current
detection of optical molecular switching in monolayers by displacement current measurement 82
detection of the current reorganization of monolayers at the air-water interface by displacement current measurement 101
a living monolayer of lipid showing well-regulated displacement-current generation 86
2-(21-Docosenyl)amino-5-nitropyridine
polymerized non-linear optical Langmuir–Blodgett films based on 2-(21-docosenyl)amino-5-nitropyridine 195
Donor-acceptor molecules
syntheses and Langmuir–Blodgett film formation of donor-acceptor molecules 205
Donor-acceptor-substituted polyenes
structural investigations of donor-acceptor-substituted polyenes 652
Dye fluorescence kinetics
dye fluorescence kinetics of Langmuir–Blodgett films 211

Dynamic contact angles
dynamic contact angles and deposition efficiency for transfer of docosanoic acid on to mica from $CdCl_2$ subphases as a function of pH 36

Electrical properties
electrical properties of copper sulfide semiconductors inserted in Langmuir–Blodgett films 407
electrical properties of Langmuir–Blodgett films of a $Ni(dmit)_2$ charge-transfer complex 257
Electrical transport properties
electrical transport properties of Josephson junctions with a Nb/Au/PI/(Pb–Bi) structure 277
Electrically conductive LB films
fabrication of electrically conductive Langmuir–Blodgett films comprised of poly(3-hexylthiophene) and nickel tetra-tert-butyl phthalocyanine 274
Electroactive LB films
Langmuir–Blodgett films based on substituted 1,2-dithiolium tetrac /anoquinodimethane radical anion salt 330
Electroactive polymers
new developments in the Langmuir–Blodgett manipulation of electroactive polymers 246
Electrocatalytic reduction of CO_2
electrocatalytic reduction of CO_2 on a modified electrode with Langmuir–Blodgett films of nickel(II) complex with long alkyl substituted cyclam 381
Electrochemical behavior
electrochemical behavior of *N*-methyl-*N'*-hexadecylviologen monolayers on silver electrodes: effects of counterions 822
Electrochemical processes
photochemical switching of electrochemical processes on modified electrodes with ionic spiropyran Langmuir–Blodgett films 384
Electrochemistry
electrochemistry of viologen-containing Langmuir–Blodgett film prepared by polyion complex technique 375
Electrochromism
electrochromism in mixed Langmuir–Blodgett films containing rare earth bisphthalocyanines 213
Electroluminescence
a novel range of potentially electroluminescent materials for Langmuir–Blodgett deposition 571
studies on electroluminescence of multilayer Langmuir–Blodgett films 219
Electron beam resists
polydiacetylene mono- and multilayer Langmuir–Blodgett films as electron beam resists: scanning electron microscope and Raman images 452
Electron hopping
electrochemical investigations of the lateral diffusion and electron hopping in Langmuir monolayers at the air-water interface 348
Electron resist
preparation of cyanoacrylate Langmuir–Blodgett films and their ultraviolet and electron resist application 477
Electron spin resonance
electron spin resonance in Langmuir–Blodgett films of a merocyanine dye and its isotope-substituted analogs 512
Electron transfer
gold surface enhanced Raman spectroscopy of amphiphilic sulfur viologens during electron transfer 825
Electron transport
electron transport across organic quantum wells: new results on amphiphilic phthalocyanines 253

Electron tunneling
electron tunneling through a self-adsorbed monolayer of fatty acids on Al/AlO_x substrate 508
Electronic and optical studies
electronic and optical studies with Langmuir–Blodgett transistors 283
Electronic structure
electronic structure of nitrogen square planar copper complexes in Langmuir–Blodgett films 519
Electronic transport
electronic transport in Langmuir–Blodgett films of metal–$(dmit)_2$ 306
Electrooptic modulation
electrooptic modulation in polymer/Langmuir–Blodgett film waveguides 216
Electrooptical spectroscopy
electro-optical spectroscopy on aggregated chromophore systems in Langmuir–Blodgett films 670
Electrooxidation
electro-oxidation of dioctadecylthioethylenedithiotetrathiofulvalene Langmuir–Blodgett films 280
Energy transfer
metal ion sensor based on dioctadecyldithiocarbamate-metal complex induced energy transfer 434
Enzymes
quantitative characterization of enzymes adsorbed on to Langmuir–Blodgett films and the application to a urea sensor 443
Equipment
equipment for the preparation of polar and heterogeneous Langmuir–Blodgett films 46
Excitation energy transfer
excitation energy transfer between J-aggregates of cyanine dyes in Langmuir–Blodgett films and liposomes 172

Fatty acid monolayers
investigation of fatty acid monolayers at the air-water interface using a reflectance-measuring technique and a phase contrast microscope 51
Fatty acids
electron tunneling through a self-adsorbed monolayer of fatty acids on Al/AlO_x substrate 508
Ferroelectric liquid crystalline compounds
the behavior of ferroelectric liquid crystalline compounds at the air-water interface 114
Field-effect transistors
a gas sensor fabricated with field-effect transistors and Langmuir–Blodgett film of porphyrin 486
Film preparation
improvement in film preparation and fluorescence decay measurements of $Ru(bpy)_3^{2+}$ derivative for determination of photoinduced electron transfer rates in heterogeneous Langmuir–Blodgett films 265
Flow orientation effects
theory of flow orientation effects in Langmuir–Blodgett films: examination of the local thermal equilibrium approximation 32
Fluorescence decay measurements
improvement in film preparation and fluorescence decay measurements of $Ru(bpy)_3^{2+}$ derivative for determination of photoinduced electron transfer rates in heterogeneous Langmuir–Blodgett films 265
Fluorescence energy transfer
an optical biosensor principle based on fluorescence energy transfer 480
Fluorescence quenching
oxygen induced fluorescence quenching of pyrene labeled phospholipid in matrix monolayers at the gas-water interface 228
Fluorescent probes
observation of first order phase transitions in monolayers without fluorescent probes 121
Fluorocarbon amphiphile
preparation of multi-layered films of poly(stearyl acrylate) using cast films of a novel fluorocarbon amphiphile as two- dimensional templates 828
Fourier transform infrared spectroscopy
Fourier transform infrared spectroscopic studies on model biological membranes deposited by the Langmuir–Blodgett technique 574
FTIR studies of conducting Langmuir–Blodgett films of *o*-hexadecylthiocarboxytetrathiafulvalene 589
Functionalized lipid monolayers
steric and electrostatic aspects of antibody binding to hapten functionalized lipid monolayers 793

Gangliosides
direct measurement of the forces between gangliosides deposited on mica surfaces 696
Gas detection
gas detection in the ppb-range with a high frequency, high sensitivity surface acoustic wave device 472
hybrid gas detector of squarylium dye Langmuir–Blodgett film deposited on a quartz oscillator 471
Gas sensing
conducting Langmuir–Blodgett films of tetracyanoquinodimethane and ethylenedithio-tetrathiafulvalene derivatives applied to gas sensing: gas diffusion and detection ranges 430
Gas sensor
a gas sensor fabricated with field-effect transistors and Langmuir–Blodgett film of porphyrin 486
Gases
selectivity of toxic and acid gases over methane and nitrogen in Langmuir–Blodgett films 440
Gas-sensitive films
the biomimetic property of gas-sensitive films for odorants constructed by the Langmuir–Blodgett technique 455
Gas-sensitive properties
the characterization of two copper phthalocyanine Langmuir–Blodgett films and their gas-sensitive properties 606
Glucose biosensor
elaboration of a glucose biosensor based on Langmuir–Blodgett technology 489
Gold
self-assembled monolayers of alkanethiols on gold: sulfone groups enhancing two-dimensional organization 806
self-assembled organic films on gold and silver 799
self-assembly of thiolipid molecular layers on gold surfaces: optical and electrochemical characterization 818
surface modification and functionalization of gold by sulfur-containing polymeric monolayers 787
surface plasmon studies of specific recognition reactions at self-assembled monolayers on gold 815
Gold surface enhanced Raman spectroscopy
gold surface enhanced Raman spectroscopy of amphiphilic sulfur viologens during electron transfer 825
Guanidinium
the interaction of a guanidinium monolayer with ATP and AMP, as revealed by surface potential and UV absorption measurements 776

Guided-wave frequency-doubling
guided-wave frequency-doubling in Langmuir–Blodgett film waveguides 153

Hapten
steric and electrostatic aspects of antibody binding to hapten functionalized lipid monolayers 793
Hemicyanine monolayer
symmetry and orientational structure in hemicyanine monolayer by surface second harmonic generation and absorption spectroscopy 699
Hepatitis B
physicochemical properties of hepatitis B peptide fragments at the air-water and lipid-water interfaces 750
Hetero LB films
photogenerated charge storage in hetero Langmuir–Blodgett films including steroidal TCNQ, Cu phthalocyanine and steroidal *p*-phenylenediamine 268
Heterocycles
theoretical study on the effect of heterocycles reinforcing the layered structure 169
Heterocyclic chromophores
UV study on the interaction of amphiphiles with heterocyclic chromophores 124
Heterogeneous LB films
equipment for the preparation of polar and heterogeneous Langmuir–Blodgett films 46
improvement in film preparation and fluorescence decay measurements of $Ru(bpy)_3^{2+}$ derivative for determination of photoinduced electron transfer rates in heterogeneous Langmuir–Blodgett films 265
Heterogeneous surfaces
wetting studies of molecularly heterogeneous surfaces using two liquid systems 810
Heterojunctions
photo-induced electron transfer in molecular heterojunctions using flavin-porphyrin Langmuir–Blodgett multilayers 290
Hexadecylvinylbenzyldimethylammonium chloride
Langmuir–Blodgett films of hexadecylvinylbenzyldimethylammonium chloride and their ozone sensitivity 368
High-resolution optical spectroscopy
high-resolution optical spectroscopy of Langmuir–Blodgett films 141
Homodoping
the homodoping strategy towards Langmuir–Blodgett conducting films: mixture of amphiphilic octadecyl-tetracyanoquinodimethane with various semi-amphiphilic tetracyanoquinodimethane salts 250
Homo-epitaxy
homo-epitaxy of diacetylene vapor deposition film on an oriented Langmuir monolayer 353
Horizontal deposition
Langmuir–Blodgett resists of diazonaphthoquinone novolac resin produced by a new continuous horizontal deposition method 484
Horizontal lifting method
evaluation of a horizontal lifting method of Langmuir–Blodgett films using a quartz-crystal microbalance 702
Hydrophobic alkyl chains
three types of aggregates of spiropyran with long and short hydrophobic alkyl chains 175
12-Hydroxystearic acid
Fourier transform infrared metal overlayer attenuated total reflection spectra of Langmuir–Blodgett films of 12-hydroxystearic acid and its cadmium salt 583

Imaging
imaging of the lateral structure of Langmuir–Blodgett films by metal decoration and polarization microscopy 674
Immunoglobulin G
oriented immunoglobulin G layer onto the Langmuir–Blodgett films of protein A 710
Infrared spectroscopy
resonance Raman and infrared studies of Langmuir–Blodgett films of 3,3-dimethyl-2-[3-(3,3-dimethyl-1-octadecyl-2-indolinylidene)-1-propenyl]-1-octadecyl-3H-indolium iodide 597
structural evaluation of Langmuir–Blodgett films of amphiphilic phthalocyanines using infrared spectroscopy 538
Inorganic monolayers
toward inorganic monolayers inserted in a Langmuir–Blodgett matrix 410
Interlayer energy transfer
stabilization of the layer structure of poly(vinyl octal) Langmuir–Blodgett films studied by the interlayer energy transfer method 614
In-plane dichroism
influence of substituents on in-plane dichroism in Langmuir–Blodgett films of phthalocyanine derivatives 535
In-plane orientation
in-plane orientation of a hexadodecyloxy substituted triaryl pyrylium salt by the Langmuir–Blodgett method 586
Ion channel transduction
ion channel transduction in Langmuir–Blodgett lipid membranes 707
Ionic network
synthesis of an ionic network by molecular recognition between two porphyrins at the air-water interface 769

Josephson junctions
electrical transport properties of Josephson junctions with a Nb/Au/PI/(Pb–Bi) structure 277

Lateral diffusion
electrochemical investigations of the lateral diffusion and electron hopping in Langmuir monolayers at the air-water interface 348
Layered structure
theoretical study on the effect of heterocycles reinforcing the layered structure 169
Lead sulfide monolayers
X-ray photoelectron spectroscopy of non-stoichiometric lead sulfide monolayers in stearic acid Langmuir–Blodgett films 401
Light scattering
investigation of molecular layers on a liquid surface by light scattering 89
Lipid membranes
chemically driven phase separation in black lipid membranes and its coupling to membrane functions 756
ion channel transduction in Langmuir–Blodgett lipid membranes 707
photoelectric response of black lipid membranes incorporating an amphiphilic azobenzene derivative 736
Lipid monolayers
a living monolayer of lipid showing well-regulated displacement-current generation 86
fusion of phospholipid vesicles with a Langmuir lipid monolayer 57
lateral proton conduction along lipid monolayers spread at the air-water interface 713

Lipid monolayers (continued)
penetration kinetics of *cis*-diamminedichloroplatinum(II) loaded nanoparticles in lipid monolayers as a membrane model of the reticuloendothelial system 364
structural changes in lipid monolayers during the Langmuir–Blodgett transfer due to substrate/monolayer interactions 9
Lipid surfaces
molecular recognition processes at functionalized lipid surfaces: a neutron reflectivity study 659
Lipids
surfactin: interfacial properties and interactions with membrane lipids in mixed monolayers 730
Lipid-free multilayers
time-resolved surface photovoltage spectroscopy of lipid-free CuTsPc multilayers on *p*-Si(111) 327
Liposomes
excitation energy transfer between J-aggregates of cyanine dyes in Langmuir–Blodgett films and liposomes 172
Liquid crystal alignment
modulated photoregulation of liquid crystal alignment by azobenzene Langmuir–Blodgett layers 836
Liquid crystal cells
properties of liquid crystal cells of pyrolyzed polyimide Langmuir–Blodgett films 458
Liquid crystals
creation and structural comparison of ultrathin film assemblies: transferred freely suspended films and Langmuir–Blodgett films of liquid crystals 504
Liquid-crystalline azo-dye
Langmuir–Blodgett–Kuhn multilayer assemblies of liquid-crystalline azo-dye side chain homo- and copolymers 500
Low molecular weight guest compounds
mixed polymeric monolayers and Langmuir–Blodgett multilayers with functional low molecular weight guest compounds 191

Membrane functions
chemically driven phase separation in black lipid membranes and its coupling to membrane functions 756
Merocyanine dye
electron spin resonance in Langmuir–Blodgett films of a merocyanine dye and its isotope-substituted analogs 512
infrared and inelastic electron tunneling spectroscopy of adsorption Langmuir–Blodgett films containing crystal violet and merocyanine dye 531
Metal decoration
imaging of the lateral structure of Langmuir–Blodgett films by metal decoration and polarization microscopy 674
Metal–$(dmit)_2$
electronic transport in Langmuir–Blodgett films of metal–$(dmit)_2$ 306
Metal ion sensor
metal ion sensor based on dioctadecyldithiocarbamate-metal complex induced energy transfer 434
Metal ions
interactions between monolayers and metal ions at the water-air interface: conditions for the transferability as Langmuir–Blodgett multilayers 42
Metal/LB film/metal structures
identification of the process producing observed rectifying characteristics of metal/Langmuir–Blodgett film/metal structures 313
Metal/LB/GaAs structures
charge transient spectroscopy studies on metal/Langmuir–Blodgett/GaAs structures 324
Metalloporphyrin complexes
the properties and structural characteristics of Langmuir–Blodgett films of two metalloporphyrin complexes with differential substituents 545
Metal overlayer
Fourier transform infrared metal overlayer attenuated total reflection spectra of Langmuir–Blodgett films of 12-hydroxystearic acid and its cadmium salt 583
Metal surfaces
the structure and stability of metal surfaces modified by silane Langmuir–Blodgett films 592
Methacrylate oligomer chains
Langmuir–Blodgett film assembly of Cu-phthalocyanine derivatives substituted by methacrylate oligomer chains 527
Methyl viologens
electrochemical behavior of *N*-methyl-*N'*-hexadecylviologen monolayers on silver electrodes: effects of counterions 822
Mica
direct measurement of the forces between gangliosides deposited on mica surfaces 696
dynamic contact angles and deposition efficiency for transfer of docosanoic acid on to mica from $CdCl_2$ subphases as a function of pH 36
Microelectrode arrays
preparation and characterization of redox active molecular assemblies on microelectrode arrays 341
Microscopy
reflectometry at the Brewster angle and Brewster angle microscopy at the air-water interface 64
Microstructures
synthesis of polysiloxane films with varied microstructures in matrices of carbazole-containing bilayer membranes 26
Mixed LB films
on the structure of mixed Langmuir–Blodgett films 637
Mixed monolayers
thermodynamic study on phase transition in mixed monolayers of cholesterol, lecithin and lithocholic acid 127
Molecular electronic devices
molecular information processing and molecular electronic devices 1
Molecular engineering
two-dimensional molecular engineering of amphiphilic dithio tetrathiafulvalene derivatives 131
Molecular information processing
molecular information processing and molecular electronic devices 1
Molecular layers
investigation of molecular layers on a liquid surface by light scattering 89
Molecular orientation
molecular orientation in conductive Langmuir–Blodgett films of a charge-transfer complex 303
molecular orientation of photogenerated radicals in novel photoelectrochromic Langmuir–Blodgett films 617
molecular orientations of substituted phthalocyaninato-polysiloxanes in Langmuir–Blodgett films 22
Molecular packing
molecular packing of amphiphilic polyamic acid systems in Langmuir–Blodgett films 620
Molecular recognition
molecular recognition by amphiphilic cyclodextrins in Langmuir–Blodgett films 803
molecular recognition in biotin-streptavidin systems and analogues at the air-water interface 780

Molecular recognition (continued)
molecular recognition processes at functionalized lipid surfaces: a neutron reflectivity study 659
molecular recognition reactions at interfaces as seen by fluorescence, plasmon surface polaritons and atomic force microscopy 666
synthesis of an ionic network by molecular recognition between two porphyrins at the air-water interface 769
Molecular superstructures
investigation of molecular superstructures of hairy rodlike polymers by X-ray reflection 397
Monolayer characterisation
monolayer characterisation and multilayer deposition of conducting Langmuir–Blodgett films 287
capillary waves: a new monolayer characterization technique using an old method 96
Monolayers
bending elastic modulus of monolayers at oil-water interfaces 118
characterization of Langmuir–Blodgett monolayers using polarization modulated FTIR spectroscopy 648
characterization of monolayers and Langmuir–Blodgett films of dry and wet chlorophyll *a* 739
charge-transfer complex formation in monolayers at the air-water interface 60
conductivity in phthalocyanines and mixed phthalocyanine/lipid monolayers at the air-water interface 766
control of the reactivity of chemically adsorbed monolayers of polydiacetylene derivatives exposed to UV irradiation 790
defect annealing rate in monolayers displaying a smectic-L phase 515
detection of optical molecular switching in monolayers by displacement current measurement 82
detection of the current reorganization of monolayers at the air-water interface by displacement current measurement 101
drugs in biomimetic models: a monolayer study of two antibodies 747
electrochemical behavior of *N*-methyl-*N'*-hexadecylviologen monolayers on silver electrodes: effects of counterions 822
electrochemical investigations of the lateral diffusion and electron hopping in Langmuir monolayers at the air-water interface 348
factors determining stability of bacteriochlorophyll monolayers 753
homo-epitaxy of diacetylene vapor deposition film on an oriented Langmuir monolayer 353
incorporation of cytochrome b_5 into supported phospholipid bilayers by vesicle fusion to supported monolayers 763
incorporation of non-amphiphilic compounds into host monolayers 135
interactions between monolayers and metal ions at the water-air interface: conditions for the transferability as Langmuir–Blodgett multilayers 42
Langmuir–Blodgett films of archaebacterial lipid models: 1,1'-polymethylenebis(2-alkyl-*sn*-glycero-3-phosphocholine) 108
monolayer formation of a novel amphiphilic polymer $PAMC_{16}S$ 839
monolayers of photosynthetic reaction centers of green and purple bacteria 723
mono- and multilayers made from discotic liquid crystals 39
observation of first order phase transitions in monolayers without fluorescent probes 121
ordered domains in a Langmuir monolayer: structure and line energy 138
oxygen induced fluorescence quenching of pyrene labeled phospholipid in matrix monolayers at the gas-water interface 228
phospholipid-protein interactions at the air-water interface: a monolayer study 743
photoinduced electron transfer in monolayers at the monolayer-water (acceptor) interface 335
the polymerization of monolayers of some unsaturated fatty acids 372
water permeation through monolayers of polymerised surfactants 69
Multilayer assemblies
Langmuir–Blodgett–Kuhn multilayer assemblies of liquid-crystalline azo-dye side chain homo- and copolymers 500
Multilayer deposition
monolayer characterisation and multilayer deposition of conducting Langmuir–Blodgett films 287
Multilayers
buildup of ultrathin multilayer films by a self-assembly process: III. Consecutively alternating adsorption of anionic and cationic polyeletrolytes on charged surfaces 831
fast photoconduction in Langmuir–Blodgett multilayers of polydiacetylenes 271
interactions between monolayers and metal ions at the water-air interface: conditions for the transferability as Langmuir–Blodgett multilayers 42
Langmuir–Blodgett films based on substituted 1,2-dithiolium tetracyanoquinodimethane radical anion salt 330
mixed polymeric monolayers and Langmuir–Blodgett multilayers with functional low molecular weight guest compounds 191
mono- and multilayers made from discotic liquid crystals 39
photo-induced electron transfer in molecular heterojunctions using flavin-porphyrin Langmuir–Blodgett multilayers 290
preparation of multi-layered films of poly(stearyl acrylate) using cast films of a novel fluorocarbon amphiphile as two-dimensional templates 828
some pyramidic liquid crystal Langmuir films at the air-water interface 93
studies on electroluminescence of multilayer Langmuir–Blodgett films 219
Multilayers from polymers
Langmuir–Blodgett multilayers from polymers for low loss planar waveguides 182
Multilayer-deposited optical fiber
transduction of chemical signals to optical signals by using multibilayer-deposited optical fiber 465
Multiple-angle reflectometry
optical properties of Langmuir–Blodgett films: a multiple-angle reflectometric investigation 521
Multistructures
new organic luminophores for Langmuir multistructures 224

Neutron reflectivity
molecular recognition processes at functionalized lipid surfaces: a neutron reflectivity study 659
Nickel(II)
electrocatalytic reduction of CO_2 on a modified electrode with Langmuir–Blodgett films of nickel(II) complex with long alkyl substituted cyclam 381
p-Nitroaniline derivatives
structure and nonlinear optical properties of Langmuir–Blodgett films from *p*-nitroaniline derivatives 185

Nitrogen dioxide
relationship between structure and function of a Langmuir–Blodgett film of an amphiphilic Ni-phthalocyanine responsive to NO_2 446
Nitrogen square planar copper complexes
electronic structure of nitrogen square planar copper complexes in Langmuir–Blodgett films 519
$Ni(dmit)_2$ charge-transfer complex
electrical properties of Langmuir–Blodgett films of a $Ni(dmit)_2$ charge-transfer complex 257
Nonlinear optical properties
photochemical modulation of second order nonlinear optical properties of alternate Langmuir–Blodgett films containing Ru^{II}-bipyridine complexes 160
Nonlinear optics
IR analysis of Langmuir–Blodgett films for nonlinear optics 234
Non-amphiphilic compounds
incorporation of non-amphiphilic compounds into host monolayers 135

Odorants
the biomimetic property of gas-sensitive films for odorants constructed by the Langmuir–Blodgett technique 455
Optical anisotropy photoinduction
soliton mechanism of optical anisotropy photoinduction in Langmuir–Blodgett films 542
Optical biosensor
an optical biosensor principle based on fluorescence energy transfer 480
Optical bistability
optical bistability of an optical waveguide coated with nonlinear Langmuir–Blodgett films 156
Optical dyes
Langmuir–Blodgett films of non-linear optical dyes with chiral centers in matrices of amylose esters 166
Optical LB films
polymerized non-linear optical Langmuir–Blodgett films based on 2-(21-docosenyl)amino-5-nitropyridine 195
Optical molecular switching
detection of optical molecular switching in monolayers by displacement current measurement 82
Optical molecules
Langmuir–Blodgett films of polymers containing nonlinear optical molecules in the side chains 202
Optical properties
optical properties of Langmuir–Blodgett films: a multiple-angle reflectometric investigation 521
structure and nonlinear optical properties of Langmuir–Blodgett films from *p*-nitroaniline derivatives 185
studies on non-linear optical properties of Langmuir–Blodgett films formed from azobenzocrown ether derivatives 208
Optical techniques
investigation of chromophore orientation of 2-docosylamino-5-nitropyridine and derivatives by nonlinear optical techniques 198
Ordered domains
ordered domains in a Langmuir monolayer: structure and line energy 138
Organic electroluminescent devices
organic electroluminescent device with cyanine dye Langmuir–Blodgett film as an emitter 468
Organic luminophores
new organic luminophores for Langmuir multistructures 224
Organic quantum wells
electron transport across organic quantum wells: new results on amphiphilic phthalocyanines 253

Orientation
in plane orientation of polyimide Langmuir–Blodgett films 29
Overlayers
characterization of Langmuir–Blodgett overlayers by time-of-flight secondary ion mass spectrometry 601
Ozone sensitivity
Langmuir–Blodgett films of hexadecylvinylbenzyldimethylammonium chloride and their ozone sensitivity 368

Pattern formation
pattern formation and photophysical applications of Langmuir–Blodgett multilayers based on polyglutamates 449
Patterning
deep UV photochemistry and patterning of self-assembled monolayer films 359
Penetration kinetics
penetration kinetics of *cis*-diamminedichloroplatinum(II) loaded nanoparticles in lipid monolayers as a membrane model of the reticuloendothelial system 364
Phase contrast microscope
investigation of fatty acid monolayers at the air-water interface using a reflectance-measuring technique and a phase contrast microscope 51
Phase separation
chemically driven phase separation in black lipid membranes and its coupling to membrane functions 756
Phase transition
observation of first order phase transitions in monolayers without fluorescent probes 121
thermodynamic study on phase transition in mixed monolayers of cholesterol, lecithin and lithocholic acid 127
Phonon conduction process
phonon conduction process in Langmuir–Blodgett films 634
Phosphatidylcholines
pulmonary surfactant protein SP-C and phosphatidylcholines in bilayers and monolayers 720
Phospholipid
analytical surface spectroscopy of phospholipid Langmuir–Blodgett films 565
Phospholipid bilayers
incorporation of cytochrome b_5 into supported phospholipid bilayers by vesicle fusion to supported monolayers 763
Phospholipid vesicles
fusion of phospholipid vesicles with a Langmuir lipid monolayer 57
Phospholipid-protein interactions
phospholipid-protein interactions at the air-water interface: a monolayer study 743
Photochemical modulation
photochemical modulation of second order nonlinear optical properties of alternate Langmuir–Blodgett films containing Ru^{II}-bipyridine complexes 160
Photochemical switching
control of photochemical switching phenomena by chemical modification 293
photochemical switching of electrochemical processes on modified electrodes with ionic spiropyran Langmuir–Blodgett films 384
Photochemistry
deep UV photochemistry and patterning of self-assembled monolayer films 359
Photochromic spiropyrans
aggregation control of photochromic spiropyrans in Langmuir–Blodgett films 562

Photochromism
photochromism of spiropyran on supermolecular assemblies 784
Photoconduction
fast photoconduction in Langmuir–Blodgett multilayers of polydiacetylenes 271
Photocurrents
rectified photocurrents from purple membrane Langmuir–Blodgett films at the electrode-electrolyte interface 146
Photodiodes
preparation of polyimide Langmuir–Blodgett films possessing a triphenylamine unit and their application to photodiodes 96
Photoelectric characteristics
Langmuir–Blodgett films of reaction centers of *Rhodopseudomonas viridis*: photoelectric characteristics 733
Photoelectric properties
photoelectric properties of Langmuir–Blodgett films containing amphipathic porphyrin and carbazole 332
Photoelectric response
photoelectric response of black lipid membranes incorporating an amphiphilic azobenzene derivative 736
Photoelectrochromic LB films
molecular orientation of photogenerated radicals in novel photoelectrochromic Langmuir–Blodgett films 617
Photogenerated charge storage
photogenerated charge storage in hetero Langmuir–Blodgett films including steroidal TCNQ, Cu phthalocyanine and steroidal *p*-phenylenediamine 268
Photogenerated radicals
molecular orientation of photogenerated radicals in novel photoelectrochromic Langmuir–Blodgett films 617
Photoinduced charge transfer
photoinduced charge transfer in semi-amphiphilic porphyrin-phthalocyanine mixed dimers 150
Photoinduced electron transfer
photoinduced electron transfer in monolayers at the monolayer-water (acceptor) interface 335
Photoinduced electron transfer
photo-induced electron transfer in molecular heterojunctions using flavin-porphyrin Langmuir–Blodgett multilayers 290
Photoinduced proton transfer
photoinduced proton transfer in Langmuir–Blodgett films 378
Photophysical applications
pattern formation and photophysical applications of Langmuir–Blodgett multilayers based on polyglutamates 449
Photopolymerization
photopolymerization of a ω-tricosenoyl derivative of β-cyclodextrin in Langmuir–Blodgett films 387
Photoregulation
modulated photoregulation of liquid crystal alignment by azobenzene Langmuir–Blodgett layers 836
Photoresponse
photoresponse of Langmuir–Blodgett film containing bacteriorhodopsin 760
Photosynthetic reaction centers
monolayers of photosynthetic reaction centers of green and purple bacteria 723
Phthalocyanine
angle-resolved photoemission from Langmuir–Blodgett films of copper tetrakis(n-butoxycarbonyl)phthalocyanine with synchrotron radiation 678
conductivity in phthalocyanines and mixed phthalocyanine/lipid monolayers at the air-water interface 766
influence of substituents on in-plane dichroism in Langmuir–Blodgett films of phthalocyanine derivatives 535
Phthalocyanine-polysiloxanes
molecular orientations of substituted phthalocyaninato-polysiloxanes in Langmuir–Blodgett films 22
Physicochemical properties
physicochemical properties of hepatitis B peptide fragments at the air-water and lipid-water interfaces 750
Piezoelectric effect
the measurement of the piezoelectric effect in Langmuir–Blodgett films 338
Polar LB films
equipment for the preparation of polar and heterogeneous Langmuir–Blodgett films 46
Polar multilayer LB films
polar multilayer Langmuir–Blodgett films of *p*-(*p*-octadecyloxyphenylazo)benzenesulfonamide 631
Polarization microscopy
imaging of the lateral structure of Langmuir–Blodgett films by metal decoration and polarization microscopy 674
Polarization modulated FTIR spectroscopy
characterization of Langmuir–Blodgett monolayers using polarization modulated FTIR spectroscopy 648
Polyamine
preparation and properties of polyamine Langmuir–Blodgett films 390
Polydiacetylene
absorption properties and structure changes caused by preannealing in polydiacetylene Langmuir–Blodgett films 548
control of the reactivity of chemically adsorbed monolayers of polydiacetylene derivatives exposed to UV irradiation 790
polydiacetylene mono- and multilayer Langmuir–Blodgett films as electron beam resists: scanning electron microscope and Raman images 452
Polyelectrolytes
buildup of ultrathin multilayer films by a self-assembly process: III. Consecutively alternating adsorption of anionic and cationic polyeletrolytes on charged surfaces 831
Polyglutamate multilayers
pattern formation and photophysical applications of Langmuir–Blodgett multilayers based on polyglutamates 449
Polyheterocyclic compounds
Langmuir–Blodgett films of polyheterocyclic compounds with long alkyl chains 555
Polyimide LB films
fabrication of fine patterns by positive working resists using a polyimide Langmuir–Blodgett film system 461
in plane orientation of polyimide Langmuir–Blodgett films 29
preparation of polyimide Langmuir–Blodgett films possessing a triphenylamine unit and their application to photodiodes 96
properties of liquid crystal cells of pyrolyzed polyimide Langmuir–Blodgett films 458
Polyion complex LB films
structural characterization of polyion complex Langmuir–Blodgett films of perfluoroundecanoic acid-polyethyleneimine 559
Polyion complex technique
electrochemistry of viologen-containing Langmuir–Blodgett film prepared by polyion complex technique 375
Polymaleic acid
synthesis of monoesters of polymaleic acid and characterization of their Langmuir–Blodgett films 610
Polymer monolayers
an approach to improving the homogeneity of polymer monolayers 16

Polymeric gegenions
polymeric gegenions induced variability and mobility of amphiphilic supramolecular structures on solid substrates 111
Polymeric monolayers
mixed polymeric monolayers and Langmuir–Blodgett multilayers with functional low molecular weight guest compounds 191
Polymerization
real time investigations of the polymerization of 2-pentadecyl aniline on the Langmuir–Blodgett trough 356
the polymerization of monolayers of some unsaturated fatty acids 372
Polymerized monomolecular films
two-dimensional structures in polymerized monomolecular films 412
Polymerized surfactants
water permeation through monolayers of polymerised surfactants 69
Polymers
Langmuir–Blodgett films of polymers containing nonlinear optical molecules in the side chains 202
Polypeptide monolayers
oriented polypeptide monolayers by rapid spontaneous condensation of amphiphilic amino acid esters 393
Polysiloxane LB films
synthesis of polysiloxane films with varied microstructures in matrices of carbazole-containing bilayer membranes 26
the synthesis and evaluation of novel polysiloxane Langmuir–Blodgett films 299
Poly(isocyanide)s
Langmuir–Blodgett films of poly(isocyanide)s with different sidechains. 2. Poly(3-cholesteryl-6-isocyanohexanoate) 496
Poly(stearyl acrylate)
preparation of multi-layered films of poly(stearyl acrylate) using cast films of a novel fluorocarbon amphiphile as two-dimensional templates 828
Poly(vinyl octal) LB films
stabilization of the layer structure of poly(vinyl octal) Langmuir–Blodgett films studied by the interlayer energy transfer method 614
Poly-3-BCMU films
structural studies of Langmuir–Blodgett poly-3-BCMU films 551
Porphyrin
a gas sensor fabricated with field-effect transistors and Langmuir–Blodgett film of porphyrin 486
synthesis of an ionic network by molecular recognition between two porphyrins at the air-water interface 769
Positive working resists
fabrication of fine patterns by positive working resists using a polyimide Langmuir–Blodgett film system 461
Preformed polymers
second harmonic generation in Langmuir–Blodgett films of preformed polymers 188
Pre-annealing
absorption properties and structure changes caused by pre-annealing in polydiacetylene Langmuir–Blodgett films 548
Protein A
oriented immunoglobulin G layer onto the Langmuir–Blodgett films of protein A 710
Proton conduction
lateral proton conduction along lipid monolayers spread at the air-water interface 713
Pulmonary surfactant protein
pulmonary surfactant protein SP-C and phosphatidylcholines in bilayers and monolayers 720
Purple membrane
rectified photocurrents from purple membrane Langmuir–Blodgett films at the electrode-electrolyte interface 146
Pyramidic liquid crystal
some pyramidic liquid crystal Langmuir films at the air-water interface 93
Pyrazine derivatives
second-order nonlinear optical Langmuir–Blodgett films of pyrazine derivatives 163
Pyroelectric behaviour
pyroelectric behaviour of synthetic biomembrane structures 320
Pyroelectric organo-ruthenium
pyroelectric organo-ruthenium Langmuir–Blodgett films 427
Pyroelectric response
the effect of the external DC electric field on pyroelectric response of azocompound-based Langmuir–Blodgett films 437
Pyrylium
in-plane orientation of a hexadodecyloxy substituted triaryl pyrylium salt by the Langmuir–Blodgett method 586

Quartz crystal microbalance
evaluation of a horizontal lifting method of Langmuir–Blodgett films using a quartz-crystal microbalance 702
Quartz crystal resonator
visco-elastic properties of thin films probed with a quartz crystal resonator 662
Quartz oscillator
hybrid gas detector of squarylium dye Langmuir–Blodgett film deposited on a quartz oscillator 471

Rare earth bisphthalocyanines
electrochromism in mixed Langmuir–Blodgett films containing rare earth bisphthalocyanines 213
Rectifying characteristics
identification of the process producing observed rectifying characteristics of metal/Langmuir–Blodgett film/metal structures 313
Redox active molecular assemblies
preparation and characterization of redox active molecular assemblies on microelectrode arrays 341
Reflectance-measuring technique
investigation of fatty acid monolayers at the air-water interface using a reflectance-measuring technique and a phase contrast microscope 51
Reflectometry
reflectometry at the Brewster angle and Brewster angle microscopy at the air-water interface 64
Resonance Raman spectroscopy
resonance Raman and infrared studies of Langmuir–Blodgett films of 3,3-dimethyl-2-[3-(3,3-dimethyl-1-octadecyl-2-indolinylidene)-1-propenyl]-1-octadecyl-3H-indolium iodide 597
Reticuloendothelial system
penetration kinetics of *cis*-diamminedichloroplatinum(II) loaded nanoparticles in lipid monolayers as a membrane model of the reticuloendothelial system 364
Reversed duckweed type
a new kind of amphiphilic polymer—reversed duckweed type Langmuir–Blodgett film 625
Rhodopseudomonas viridis
Langmuir–Blodgett films of reaction centers of *Rhodopseudomonas viridis*: photoelectric characteristics 733

Rigid-rod macromolecules
on the origin of main chain orientation of rigid-rod macromolecules during the Langmuir–Blodgett process 6
Rodlike polymers
investigation of molecular superstructures of hairy rodlike polymers by X-ray reflection 397

Scanning force microscopy
defect structures of Langmuir–Blodgett films investigated by scanning force microscopy 655
Scanning optical microscopy
scanning optical microscopy of Langmuir–Blodgett films 689
Scanning tunneling microscopy
scanning tunneling microscopy and atomic force microscopy on organic and biomolecules 640
Second harmonic generation
second harmonic generation from mixed Langmuir–Blodgett films of *N*-acyl-*p*-nitroaniline and its homologous amphiphile 178
second harmonic generation in Langmuir–Blodgett films of preformed polymers 188
second harmonic generation in mixed carotenoid-fatty acid and carotinoid-cyclodextrin Langmuir–Blodgett films 221
surface coverage by adsorption or Langmuir–Blodgett technique: a comparative study using second harmonic generation 231
symmetry and orientational structure in hemicyanine monolayer by surface second harmonic generation and absorption spectroscopy 699
Secondary ion mass spectrometry
secondary ion mass spectrometry studies of mixed arachidic acid and barium arachidate Langmuir–Blodgett films 524
Second-order nonlinear optics
second-order nonlinear optical Langmuir–Blodgett films of pyrazine derivatives 163
Selectivity
selectivity of toxic and acid gases over methane and nitrogen in Langmuir–Blodgett films 440
Self-adsorbed monolayer
electron tunneling through a self-adsorbed monolayer of fatty acids on Al/AlO_x substrate 508
Self-assembled monolayers
coplanar patterns of self-assembled monolayers for selective cell adhesion and outgrowth 716
deep UV photochemistry and patterning of self-assembled monolayer films 359
self-assembled monolayers of alkanethiols on gold: sulfone groups enhancing two-dimensional organization 806
surface plasmon studies of specific recognition reactions at self-assembled monolayers on gold 815
Self-assembly
buildup of ultrathin multilayer films by a self-assembly process: III. Consecutively alternating adsorption of anionic and cationic polyeletrolytes on charged surfaces 831
self-assembled organic films on gold and silver 799
self-assembly of streptavidin/bisbiotin monolayers and multilayers 773
self-assembly of thiolipid molecular layers on gold surfaces: optical and electrochemical characterization 818
supermolecular engineering based on self-assembling monolayers and bilayers 48
Semi-amphiphilic heterodimers
photoinduced charge transfer in semi-amphiphilic porphyrin-phthalocyanine mixed dimers 150
Silane
the structure and stability of metal surfaces modified by silane Langmuir–Blodgett films 592
Silver
self-assembled organic films on gold and silver 799
Smectic-L phase
defect annealing rate in monolayers displaying a smectic-L phase 515
Soliton mechanism
soliton mechanism of optical anisotropy photoinduction in Langmuir–Blodgett films 542
Spectroscopic properties
spectroscopic properties of trichromophoric molecules incorporated in Langmuir–Blodgett films 492
Spiropyran
photochemical switching of electrochemical processes on modified electrodes with ionic spiropyran Langmuir–Blodgett films 384
photochromism of spiropyran on supermolecular assemblies 784
three types of aggregates of spiropyran with long and short hydrophobic alkyl chains 175
Squarylium dye
hybrid gas detector of squarylium dye Langmuir–Blodgett film deposited on a quartz oscillator 471
Stearic acid LB films
X-ray photoelectron spectroscopy of non-stoichiometric lead sulfide monolayers in stearic acid Langmuir–Blodgett films 402
Stearic acid monolayer
modelling the surface potential–area dependence of a stearic acid monolayer 76
Streptavidin/bisbiotin
self-assembly of streptavidin/bisbiotin monolayers and multilayers 773
Streptavidin-conjugated phycoerythrin
Langmuir–Blodgett films of streptavidin-conjugated phycoerythrin bound to biotinylated monolayers 796
Structural changes
structural changes in lipid monolayers during the Langmuir–Blodgett transfer due to substrate/monolayer interactions 9
Substrate/monolayer interactions
structural changes in lipid monolayers during the Langmuir–Blodgett transfer due to substrate/monolayer interactions 9
Sulfur viologens
gold surface enhanced Raman spectroscopy of amphiphilic sulfur viologens during electron transfer 825
Sulfur-containing polymeric monolayers
surface modification and functionalization of gold by sulfur-containing polymeric monolayers 787
Superlattices
superlattices prepared from dielectric and two-component conducting Langmuir–Blodgett layers 309
Supermolecular assemblies
photochromism of spiropyran on supermolecular assemblies 784
Supermolecular engineering
supermolecular engineering based on self-assembling monolayers and bilayers 48
Surface coverage by adsorption
surface coverage by adsorption or Langmuir–Blodgett technique: a comparative study using second harmonic generation 231
Surface forces
direct measurements of surface forces between various Langmuir–Blodgett films 681
Surface monolayer
effect of thermal treatment on crystal growth of the surface monolayer 98
Surface plasmon resonance
monolayer and multilayer film characterisation using surface plasmon resonance 685

Surface plasmon studies
surface plasmon studies of specific recognition reactions at self-assembled monolayers on gold 815
Surface potential
surface potentials of Langmuir–Blodgett alternating layer structures 4
the interaction of a guanidinium monolayer with ATP and AMP, as revealed by surface potential and UV absorption measurements 776
Surface potential–area
modelling the surface potential–area dependence of a stearic acid monolayer 76
Surface pressure
an approach to improving the homogeneity of polymer monolayers 16
the time of observation of π–A isotherms III. Studies on the morphology of arachidonic acid monolayers, observed by transmission electron microscopy of replica samples of one-layer Langmuir–Blodgett films using plasma-polymerization 79
Surfactin
surfactin: interfacial properties and interactions with membrane lipids in mixed monolayers 730
Synchrotron radiation
angle-resolved photoemission from Langmuir–Blodgett films of copper tetrakis(n-butoxycarbonyl)phthalocyanine with synchrotron radiation 678
Synthetic biomembrane structures
pyroelectric behaviour of synthetic biomembrane structures 320

Tetrathiafulvalene derivatives
conducting Langmuir–Blodgett films of new tetrathiafulvalene derivatives 317
Thermal equilibrium approximation
theory of flow orientation effects in Langmuir–Blodgett films: examination of the local thermal equilibrium approximation 32
Thermal treatment
effect of thermal treatment on crystal growth of the surface monolayer 98
Thiolipid molecular layers
self-assembly of thiolipid molecular layers on gold surfaces: optical and electrochemical characterization 818
Time of observation
the time of observation of π–A isotherms III. Studies on the morphology of arachidonic acid monolayers, observed by transmission electron microscopy of replica samples of one-layer Langmuir–Blodgett films using plasma-polymerization 79
Time-of-flight secondary ion mass spectrometry
characterization of Langmuir–Blodgett overlayers by time-of-flight secondary ion mass spectrometry 601
Time-resolved surface photovoltage spectroscopy
time-resolved surface photovoltage spectroscopy of lipid-free CuTsPc multilayers on p-Si(111) 327
Transduction
transduction of chemical signals to optical signals by using multibilayer-deposited optical fiber 465
Transistors
electronic and optical studies with Langmuir–Blodgett transistors 283
Transmission electron microscopy
molecular orientations of substituted phthalocyaninato-polysiloxanes in Langmuir–Blodgett films 22
Trichromophoric molecules
spectroscopic properties of trichromophoric molecules incorporated in Langmuir–Blodgett films 492
Tris-chromophore oligomer
Langmuir–Blodgett film formation and characterisation of a new tris-chromophore oligomer 237
Trough
real time investigations of the polymerization of 2-pentadecyl aniline on the Langmuir–Blodgett trough 356
Trough design
aspects of Langmuir–Blodgett trough design: computerization, surface pressure measurement, unevenness of motion, generated vibrations 13

Ultrathin film assemblies
creation and structural comparison of ultrathin film assemblies: transferred freely suspended films and Langmuir–Blodgett films of liquid crystals 504
Ultraviolet resist
preparation of cyanoacrylate Langmuir–Blodgett films and their ultraviolet and electron resist application 477
Unsaturated fatty acids
the polymerization of monolayers of some unsaturated fatty acids 372
Urea sensor
quantitative characterization of enzymes adsorbed on to Langmuir–Blodgett films and the application to a urea sensor 443
UV absorption
the interaction of a guanidinium monolayer with ATP and AMP, as revealed by surface potential and UV absorption measurements 776
UV irradiation
control of the reactivity of chemically adsorbed monolayers of polydiacetylene derivatives exposed to UV irradiation 790

Viologen
electrochemistry of viologen-containing Langmuir–Blodgett film prepared by polyion complex technique 375
Visco-elastic properties
visco-elastic properties of thin films probed with a quartz crystal resonator 662

Water permeation
water permeation through monolayers of polymerised surfactants 69
Waveguides
electrooptic modulation in polymer/Langmuir–Blodgett film waveguides 216
guided-wave frequency-doubling in Langmuir–Blodgett film waveguides 153
Langmuir–Blodgett multilayers from polymers for low loss planar waveguides 182
optical bistability of an optical waveguide coated with nonlinear Langmuir–Blodgett films 156
Wetting
wetting studies of molecularly heterogeneous surfaces using two liquid systems 810

X-Ray diffraction
in situ X-ray diffraction of diacetylene monolayers 73
X-Ray photoelectron spectroscopy
X-ray photoelectron spectroscopy of non-stoichiometric lead sulfide monolayers in stearic acid Langmuir–Blodgett films 402
X-Ray reflection
investigation of molecular superstructures of hairy rodlike polymers by X-ray reflection 397
